Angeles – You, John, Wayne, Enrique and I seem free today from 1-2 pm or tomorrow from 9-10 am. Would you like me to schedule a 30 minute meeting with EM to discuss response on the RESRAD question?

John/Wayne – attached is my draft response. It probably needs to be cut down, but this is a start.

Yolanda

Let's discuss before responding to Robert. My thought is to simply offer a short update for him since he's raising the Parcel G issue, ResRad, and our August letter.

The fact sheet looks very nice, but I'm not following what the 'recent public health-related questions about HPNS have been unanswered,' is referring to.

I get by reading your August letter you want a RAB reformed, but is there something beyond that?

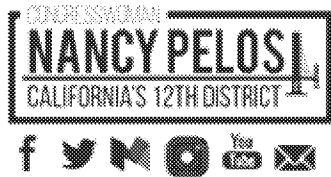

In the mean time, where are we on resolving the method to test buildings in Parcel G? Has there been movement on resolving the ResRad vs PRG debate?

Also, we're always happy to convene both EPA and Navy on a call if that's easier than trading letters to Congress.

Best,
Robert

Subject: U.S. EPA: Hunters Point Naval Shipyard – Parcel A Fact Sheet

Office of Congresswoman Nancy Pelosi
Office of Senator Dianne Feinstein
Office of Senator Kamala Harris

Dear Colleagues:

The United States Environmental Protection Agency (EPA) issued a fact sheet entitled: “Bayview Hunters Point’s Parcel A is Suitable for Residential Use.”

As you know, the Navy is the lead agency for the investigation and cleanup of the Hunters Point Naval Shipyard Superfund site (HPNS). Therefore, the Navy is the spokesperson for the site and should be providing information to address the public’s questions about the site or its past work. EPA has raised concerns to the Navy that recent public health-related questions about HPNS have been unanswered. We are also waiting for a response to our August 2020 letter requesting the Navy to complete a comprehensive evaluation of its community outreach and involvement program by the end of the calendar year.

To meet the moment and respond to requests from the community, we have agreed to produce this fact sheet to provide current information about Parcel A. The fact sheet details:

- Parcel A is suitable for work, recreational, and residential use, and Parcel A occupants are protected from site-related contamination.
- EPA removed Parcel A from being part of the Superfund site after confirming no further actions were needed to protect public health.
- The California Department of Public Health recently completed radiological surface scanning and concluded there are no radiological health concerns throughout Parcel A.
- The Office of Community Investment and Infrastructure will continue to redevelop Parcel A, working with its development partners.

This fact sheet is available to the public on our HPNS webpage. In addition, we have shared it with the Office of Community Investment and Infrastructure and the Mayor’s Hunters Point Shipyard Citizen’s Advisory Committee (HPS CAC).

Please let me know if you have any questions or need any additional information.
